

bigwig SOFT

The Next Generation Game & Software Development Company

"Whatever you need it. We make it".

INTRODUCTION

Bigwig soft is a best website design company in Coimbatore, TamilNadu. We worked with several clients as a website designing and development service provider and met their expectations successfully to run their online business successfully. Website design and development is one of our major areas of services. We also deal in SEO services and provide top quality results within limited time bounds to make your brand visibility and generate quality traffic to your online portal. We had done many projects in this web based medium that you can check our extensive portfolio. We understand that only great web design services can take your business into next higher level. We concentrated on customer satisfaction and timely delivery of our projects.

Project Specification

Integration: It is always good for your business to have a Inventory management system with a configuration that can be integrated with several modules, such as inventory management, Purchase entry, sales, Reports and Accounts.

Inventory Management: Inventory management capabilities offer an on-demand window into your stock. This way it is possible to eliminate inefficiencies, like when you're manual count inventory and dig through "the back" for a particular item. Inventory details will be displayed in the home screen of the application and Green colored boxes are entries all others will displays based on backend data manipulations.

Purchase: As per requirement purchase module has been designed into four major categories like Raw hides, Chemicals, Tanning and Wet blue. This Include contact person Name & Details in all sections to give automatic messages/replies upon request, Tanning section, Chemical name will be as check box to pick up needed chemicals, Chemical name will have the 4 sub categories to display chemical usage and charges and All the sections will have both billing & un billing strategies so develop accordingly.

Sales: This module allows the user the sell the particulars which has been updated in the purchase and manages from the inventory module. This Include contact person Name & Details in all sections to give automatic messages/replies upon request and getting their values respectively in terms of purchase and sales. This will also comes along with both billing & un billing strategies so develop accordingly.

Reporting & Analytics: Sales Reporting & Analytics function allows captures and analyzation of your store's sales data. It not just automatically keeps track of what is selling well but it also reflects how much revenue you make on each product. This enables you to recognize and focus on driving sales to your most lucrative items. Research shows that single-store retailers request for sales reporting and data analytics capabilities.

Customer Relation Management: The system maintains the profiles of regular customers, thus enhancing the customer experience by serving individual needs and building loyalty in long-term.

Stock Management: Critical Information is monitored about the store, like purchases and transactions. It reduces the time wasted on ordering and calculation of re-order levels.

Accounting: The entire accounts will be done on this application. As per clients request double database will be done for this entire application, This Include contact person Name & Details in all sections to give automatic messages/replies upon request, Quantity in one lot should be made Nil in Raw Hides section if that Lot has been entered into Tanning section and Green colored boxes are entries all others will displays based on backend data manipulations.
